7Delta, Inc. is a verified Service Disabled Veteran Owned Small Business (SDVOSB) and a leading provider of innovative technology solutions to U.S. Government agencies.

On June 30, 2011, 7Delta was awarded the **Transformation Twenty-One Total Technology (T4) Contract from the Department of Veterans Affairs (VA)**. This five-year, $12 billion contract provides full lifecycle management and enterprise-wide IT solutions, including:

- Program Management, Strategy, Enterprise Architecture, and Planning Support
- Systems/Software Engineering
- Software Technology Demonstration and Transition
- Test and Evaluation
- Independent Verification and Validation
- Enterprise Network
- Enterprise Management Framework
- Cyber Security
- Operations and Maintenance
- Training
- IT Facilities

“**T4 is a major tool in the transformation of VA into a 21st Century organization,”** said Secretary of Veterans Affairs, Eric K. Shinseki. “These contracts will enable VA to acquire services for information technology programs that will help ensure timely delivery of healthcare and benefits to our veterans.”

7Delta has been awarded more T4 task orders than any other T4 prime contractor – large or small.

**Breast Cancer Clinical Case Registry (BCCCR)**

BCCCR is a clinical case registry to monitor and track diagnostic testing, treatment, and monitoring of breast cancer for all Veterans and their beneficiaries. 7Delta leads the design and development of this clinical healthcare system.

**Virtual Lifetime Electronic Record (VLER), Nationwide Health Information Network (NwHIN)**

To minimize delays in the transition from active duty to Veteran status, the President directed the Government to create a virtual lifetime electronic record that seamlessly integrates data from DoD and VA. To support this effort, 7Delta provides program management oversight and advisory and assistance services, including: strategic planning and analysis, requirements development, business process modeling, risk management, architecture development, system integration, test and evaluation, information assurance, configuration management, production support, and training.
Office of Resolution Management (ORM) IT Infrastructure Support
The VA’s ORM maintains computer systems that support preventing, resolving, and processing workplace disputes. 7Delta provides: project management, strategy and planning, helpdesk/call center support, applications maintenance, systems engineering, server management, and video teleconferencing support. This effort also includes systems engineering, design, and installation of EMC’s Vblock™ virtualized hosting systems.

Personal Identity Verification (PIV) Fargo Printer Contractor Repair Services
VA executive leadership has mandated that all VA employees and contractors are issued PIV credentials to manage personnel security. 7Delta provides repair services for the VA’s inventory of PIV identity card printers.

Health Administration Product Enhancements (HAPE) PMO Support Services
The HAPE program manages enhancements to VA’s legacy healthcare systems. HAPE is currently tasked with planning, managing, and delivering 118 distinct enhancements for these complex systems.

Enterprise Support Solutions (ESS)
7Delta supports the administration, customization, and development of software tools utilized by VA’s 24x7 National Service Desk. Our support leverages Information Technology Service Management (ITSM) processes for the delivery of quality IT services and support.

Content Distribution Network (CDN) Support
The VA Employee Education System utilizes the CDN to deliver Veterans Affairs Knowledge Network broadcasts and content-on-demand videos to employee desktops across the VA. 7Delta provides network support and web application support.

Veterans Benefit Management System - Ratings (VBMS-R) Maintenance and Development
VBMS streamlines the Veterans’ claims benefits process. The VBMS-R application reduces the time to rate a claim for benefits. 7Delta provides business requirements analysis, design analysis, software development, software integration, data conversion, testing, release management, architectural support, and operations.

Veterans Relationship Management (VRM) Technical Integration Services
7Delta provides technical leadership, systems engineering, and systems integration for VRM, which seeks to improve the Veterans means of communicating with the VA. 7Delta services include: architecture, technical analysis and integration support, engineering support, integration testing, implementation and deployment, and information security/privacy.

“7Delta is proud to have been selected by the VA’s TAC to provide a broad range of services and products,” said Mike Sawyer, 7Delta’s CEO. “We look forward to helping the VA transform its information technology programs, which will result in improved quality of healthcare and benefits services to veterans, their families, and survivors.”
